

Bond-Rite® EZ

Portable Static Bonding Assembly

Bond-Rite EZ

The Bond-Rite EZ is a flexible device that bonds two conductive metal objects at risk of static charge accumulation.

When the Bond-Rite EZ establishes a 10 Ohms or less resistance between both conductive objects the green LED indicator illuminates, pulsing continuously.

Once connected the Bond-Rite EZ continuously monitors the resistance between both metal objects.

In addition to bonding, the Bond-Rite EZ can be used by competent electrical personnel to ground objects at risk of electrostatic charging.

In such scenarios, the competent electrical person must be sure that the grounding point, e.g. wall mounted bus-bar, has a verified connection to the general mass of the earth.

The Bond-Rite EZ houses the ground loop monitoring circuit and a bright green LED in a rugged stainless steel enclosure.

10 Ohms loop resistance monitoring based on National, International and Recommended Practices*.

Once the process is complete and any interconnecting pipework has been removed, to avoid damage/injury, the clamp should be carefully removed and placed on the appropriate stowage point.

***IEC TS 60079-32-1**

“Explosive atmospheres: Electrostatic hazards, guidance”

***NFPA 77**

“Recommended Practice on Static Electricity”

* Always check for and read the latest version of the International Standards, Guidance and/or Recommended Practices.

Bond-Rite® EZ

Features and Benefits

- Monitors the loop resistance between conductive metal objects of 10 Ohms or less based on International Standards and Recommended Practices.
- Designed for long lifetime use the **Stainless Steel clamp body** is mechanically robust and designed for use in heavy duty industrial environments - resistant to chemical attack and environmental corrosion.
- Aided by powerful spring action, **tungsten carbide teeth** support the penetration of product deposits and coatings to establish a 10 Ohms or less connection to the conductive base metal.
- **In-line quick connectors** allow flexible interchangeability of different clamp sizes and cable lengths - useful for storing and replacing clamps and cables.
- **Certified intrinsically safe circuit** permits the **Bond-Rite® EZ** to be used in the most hazardous gas, vapour and dust atmospheres.

Bond-Rite EZ

With large heavy duty clamp and 5m of Cen-Stat™ protected cable. Also available with standard size heavy duty clamp.

In-Line Quick Connect

Tungsten Carbide Teeth

Equipment Options

Grounding Clamps and Cable Length Options

Equipment specifiers can order the Bond-Rite EZ with grounding clamps (VESX45-IP, VESX50-IP or VESX90-IP) and 2-pole Cen-Stat cable on standard spiral lengths of 10 ft (3 m), 16 ft (5 m) and 32 ft (10 m) of cable.

The spiral cable retracts when the clamp is not in use, ensuring the cable is neatly stowed and safely out of the way.

VESX45-IP

VESX90-IP

VESX50-IP

Universal Resistance Tester (URT)

The URT is designed to provide users of Newson Gale **Bond-Rite®** static grounding systems with a means of testing the permissive resistance range on a regular basis.

The easy to use tester consists of a pair of rotary switches that enable a competent electrical person to check the resistance level at which the grounding system should be working and conduct a PASS / FAIL test at the required setting.

Technical Specification

North American Certification Details

Maximum Ambient Temperature	-40°F to + 140°F (-40°C to + 60°C)
Certification	Class I Div 1, Groups , A, B, C & D Class II Div 1, Groups, E, F & G Class III Div 1.
Approval Authority	CSA
Monitored Loop Resistance	Nominally ≤ 10 Ohm ($\pm 10\%$)
Indicator Lamp LED	1 Green

IECEX & ATEX Certification Details

Ingress Protection	IP64
Maximum Ambient Temperature	-40°C to +60°C
Certification	Ex II 1 GD Ex ia IIC T4 Ga Ex ia IIC T135 °C Da
Approval Authority	ExVeritas Test & Certification
Monitored Loop Resistance	Nominally ≤ 10 Ohm ($\pm 10\%$)
Indicator Lamp LED	1 Green
